Online Pharmacy Release form

At Plantation Animal Hospital, we sell products received directly from the manufacturer and speak with company representatives routinely. They advise us that they do not participate in distributing any products to online/mail order pharmacies. The products sold online could be coming from outside of the United States, such as Canada, Mexico, or Australia and are not the genuine product but made to look identical. These medications were intended for foreign markets and are not approved by the FDA and may not adhere to their standards regarding purity, potency, and instruction for use. They could also be coming from companies that consistently buy second- or third-hand before ending up at the online store. During which time, the product may have been subjected to extreme changes in temperature and/or humidity. This can adversely affect the integrity of the product and impact its effectiveness. We have received and declined requests to purchase in bulk and sell to these companies for a profit. A solicitation letter is available for viewing, upon request.

For the health of your pet, we do not recommend purchasing any prescription or retail medications through an online pharmacy.

By signing this waiver you acknowledge going against medical advice concerning your pet's health and will not hold Plantation Animal Hospital responsible for any adverse reaction or product failure from products purchased elsewhere.
